GENOMICS

Is an **international open-access** scientific journal, indexed in **SCOPUS**, that serves as platform for the disclosure of the most recent developments in **all branches of pure and applied -omics**; in the form of original research papers, letters to the editor, short communications, and critical reviews. Special interest is given to papers where more than one -omics subject is covered!

In cooperation with the organising team of the **1st Physical and Chemical Biology as the Basis of Current Medicine Conference** the journal's board has decided to dedicate a full **Special Issue** to the conference and invites all attending participants to share your communications in the form of a **full-length english article!** SCOPUS coverage and DOI number association are guaranteed, as well as international divulgence.

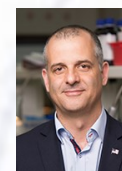

Editors-in-Chief:

Carlos Lodeiro Espiño (Portugal)
Florentino Fdez-Riverola (Spain)
Jens Coorssen (Canada)
José L. Capelo-Martinez (Portugal)
